

FOR FILM SCHOOLS AND UNIVERSITIES

Teach production the way it's really done.

Stoodiohub gives every student film the production office a professional shoot has: script to schedule, call sheets, the shot log and the wrap, on a phone, even with no signal.

Lecturers see every film in their cohorts in one place. Free for film schools and universities.

Pre-production

- Script import: PDF, Fountain, Final Draft
- Breakdown sheets in the industry layout
- Stripboard and schedule
- Locations, recces and risk assessments

The shoot

- Call sheets sent, opened and acknowledged
- Nearest A&E and weather on every sheet
- Shot list, take log, continuity notes
- Daily production report

Post and wrap

- DIT card log and safe-to-format check
- DaVinci Resolve metadata from the shot log
- Credits built from crew and cast
- Releases and contracts signed on a phone

For lecturers

- Cohorts with invite links, or joining by university email
- Every cohort film read-only: stage, shoot dates, call sheets sent, contracts signed, paperwork filed
- Step in for 24 hours with a reason, hand a film over or archive it, always logged and the owners told
- Oversight ends at the cohort's end date; students keep their films, with a "Made at" line for your school

Safety and student data

- Risk assessments with suggested hazards, approved as PDFs, read and confirmed by crew
- Child performers' licences and chaperones checked against every day
- Hosted in Germany (EU); private details encrypted, and opening them logged
- Lecturers never see contact details or profiles

A pilot with one cohort

1 Look round the demo

A finished demo film and a 15-minute 1st AD tour.

2 Set up one cohort

We set up your school; you invite students by link.

3 Run one term

Script to wrap, with check-ins from us along the way.

Cost. Free for film schools and universities. If a small admin fee would help your department raise funds, for kit or an end-of-year screening say, we can set one up together.

Learning it. 100+ short how-to guides in the app, each with a "Take me there" button, and guided tours of the demo film.
